

The 12th International Symposium of Society for the Aldh2 Knockout Mouse Research

President: Toshihiro Kawamoto

Time: 12:00 – 15:30, October 5th, 2009

Place: Department of Environmental Health, University of Occupational and Environmental Health.

Poster session 12:00 – 13:00

Chairman: Tanaka Masayuki, UOEH

DNA adducts in liver and lung of Aldh2 knockout mice treated with acetaldehyde inhalation.

Tsunehiro Oyama¹, Thi-Thu-Phuong Pham¹, Hsu-Sheng Yu¹, Masayuki Tanaka¹, Haruna Nagayoshi²,
Tomonari Matsuda², Toshihiro Kawamoto²

¹Environmental Health, University of Occupational and Environmental Health.

²Research Center for Environmental Quality Management, Kyoto University.

Lecture 13:00-15:30

Chairman: Oyama Tsunehiro, UOEH

Application of tryptophan fluorescence to assess sensitizing potentials of chemicals

Thi-Thu-Phuong Pham, Tsunehiro Oyama, Toyohi Isse, Toshihiro Kawamoto

Department of Environmental Health, University of Occupational and Environmental Health.

Characteristics of aldehyde dehydrogenase 2 (Aldh2) knockout mice

Hsu-Sheng Yu¹, Tsunehiro Oyama¹, Toyohi Isse², Kyoko Kitakawa³, Masanori Ogawa⁴,
Thi-Thu-Phuong Pham¹ and Toshihiro Kawamoto¹

¹Environmental Health, University of Occupational and Environmental Health.

²Section of Postgraduate Guidance, University of Occupational and Environmental Health.

³Department of Biochemistry, Hamamatsu University.

⁴Health Care Section, Jichi Medical University.

Office: Department of Environmental Health, University of Occupational and Environmental Health.
