

産業医科大学病院の施設拡充計画

●急性期診療棟 新築工事 開始 Start of the New Acute Care Facility Commences

将来にわたり、高度急性期医療の中核を担い、指導的役割を果たす基幹病院として更なる機能強化を図ります。

We will further strengthen our functions as a core hospital that will play a leading role in advanced acute care in the future.

●構造・規模 地上5階建、総面積22,000㎡ 急性期治療に特化 手術室17室(ハイブリッド手術室含む)、集中治療室、4病棟 総合周産期母子医療センター ほか

● Structure and Scale 5 stories above ground, total area: 22,000㎡
17 operating rooms specializing in acute care (including hybrid operating room), an intensive care unit, 4 hospital wards,
and a comprehensive perinatal and child healthcare center.

- ◆手術室は17室とし、将来の手術件数の増加に備え、増設スペースを1室確保します。
- ◆ハイブリッド手術室は3室設置(MRI、CT、アンギオ(将来整備))する計画とします。
- ◆手術室は回収廊下は設置しない中央ホール型とします。一般手術室はポッド型に配置し、面積効率が高く、手術を受ける患者さんの心理面にも配慮した計画とします。
- ◆ The facility will house 17 operating rooms with an additional room reserved to accommodate for additional demand.
- ◆ The three hybrid operating rooms will be equipped with MRI and CT, and the installation of angiography equipment is planned for the future.
- ◆ The operating rooms will be arranged in a central hall configuration, without a recovery corridor. The regular operating rooms will be set out in a pod-like configuration to maximize area efficiency. The design of the operating room also takes into consideration the psychological wellbeing of the patients undergoing surgery.

ICUは10床を整備し、そのうち2床を陰圧個室とします。
スタッフステーションを中央に配置した見守りやすいホール型とします。

The ICU will provide 10 beds, two of which will be housed in negative pressure rooms. The staff station will be located in the center of the hall for easy observation.
