

産業医とは

What do occupational health physicians do?

より快適な職場環境を形成するために
産業現場において産業医学を実践する医師

昨今の社会情勢の急激な変化により、労働者の心身のストレスは増大し、新たな健康問題が引き起こされています。職業性疾病の予防、メンタルヘルスをも含めた労働者の健康保持・増進について、衛生管理スタッフのチームリーダーとして産業医がより専門的にアプローチします。

Occupational health physicians are medical doctors who practice medical activities for occupational health at industrial sites for the purpose of creating more comfortable occupational environments.

Drastic changes in social conditions in recent years are causing increases in both mental and physical stress among workers, and new health problems are arising. For prevention of occupational diseases and for maintenance and promotion of worker's health (including mental health), occupational health physicians take an increasingly professional approach as team leaders of health care staff.

産業保健とは

What is occupational health?

働く人々の健康保持・増進と傷病の予防

働く人々の生きがいと労働の生産性の向上に寄与することを目的とした活動です。職場における様々な健康障害に対し、予防と治療を一貫させた総合的健康管理、快適な職場環境づくりを行い、作業、職務の分析に基づく労働者に適した作業管理を医学面から支援します。

Occupational health studies the maintenance and promotion of health and prevention of injury and illness for working people.

Occupational health includes activities aimed at contributing to increased productivity of workers as well as a change of pace. In the face of various health hazards at worksites, occupational health contributes to providing workers with a comfortable work environment through integrated healthcare management, combining prevention and treatment, and supports appropriate work management for workers based on the analysis of jobs and labor from a medical standpoint.
