

<2025 [18th]> Medical Education Exchange Program 2025 with Mackay Medical University, Taiwan
(Posted on Oct. 7, 2025)

Based on the Agreement signed in 2015 between Mackay Medical College (currently Mackay Medical University) in Taiwan and School of Medicine, UOEH welcomed five medical students from August 14 to September 14 for a medical education exchange program.

Following the opening ceremony and welcome reception, the students participated in clinical training for four weeks at their assigned departments, working alongside UOEH students. The program proved to be a valuable experience, allowing them to recognize various differences between Taiwan and Japan and to gain hands-on experience through practicing new medical techniques. Outside of the clinical training, the students also spent meaningful time together, making this a valuable opportunity for our students as well.

Welcome reception
